R. Shane GREENE *et al.*
Appl. No. 09/876,111**Remarks**

Reconsideration of this Application is respectfully requested.

Upon entry of the foregoing amendment, claims 1-20 are pending in the application, with 1 being the independent claim. Claims 1, 2, 3 and 5 have been amended. New claims 6-20 are sought to be added. These changes are believed to introduce no new matter, and their entry is respectfully requested. Based on the above amendment and the following remarks, Applicants respectfully request that the Examiner reconsider all outstanding objections and rejections and that they be withdrawn.

The Examiner has rejected claims 1-5 under 35 U.S.C. § 102(e) as being anticipated by U.S. Patent No. 6,405,123 to Rennard et al. Applicants respectfully traverse this rejection. The portion of Rennard et al cited by the Examiner, column 12, lines 34-54 and column 18, lines 48-53, merely teaches receiving destination or route information. In contrast, independent claim 1 as amended recites "receiving a query containing a location code regarding a point of interest, wherein said location code includes location and categorical information about said point of interest." The method then returns information about the point of interest to the user. The applied art fails to teach or suggest such a method.

Accordingly, Applicants respectfully requests that independent claim 1 be passed to allowance based on the arguments above. Further, original claims 2-5 and new claims 6-15 depend from claim 1. Accordingly, Applicants respectfully submit that these claims are also patentable over the art of record in view of the arguments above relative to claim 1 and further in view of their individual features, and therefore request that the claims 2-15 be passed to allowance.

Appl. No. 09/876,111

New independent claim 17 recites "that said information includes a visual display of said point of interest." The cited art fails to teach or suggest this feature of claim 17. As such, Applicants submit that claim 17 is patentable over the art. Further, claims 18-20 depend from claim 17 and therefore are patentable for the same reason claim 17 is patentable over the art in addition to their individual features. Accordingly, Applicants respectfully request that the claims 17-20 be passed to allowance.
